

DH/DS Series Linear Guides

DH/DS models are based on the proven NH/NS models that feature an optimized groove shape. Applying the special TF heat treatment achieves even longer life, expanding design possibilities for more compact and longer-lasting machines. TF technology helps suppress surface flaking on the raceway.

Product Features

- Double the life of standard linear guides
- Interchangeable with NH/NS models
- Available with highly dust-resistant seals / lubrication units K1-L
- Customisation to match to individual needs

Benefits

- Optimised Groove Shape
- Special TF heat treatment
- Longer Life
- Expands design possibilities for more compact or longer-lasting machines

Condition Description

- Compact Environment
- High Accuracy
- High Load
- Misalignment

Industries

- Automation
- Food and Beverage
- Machine Tools
- Medical and Health Care
- Semiconductor
